

Instructions KIT II

KIT assembly

Insert the cables into the sockets as shown in the screenshots.

The USB splitter is connected to the Surface tablet. The grey input device and audio interface are connected to this. Following this the Surface can be started.

The black XLR microphone jack is inserted into «INPUT 1L» on the front of the audio interface.

The headphones are also connected to the Surface..

After this the audio interface is connected to the USB splitter with a USB cable (rear side).
